

Minor Ailment Care

The Centre for Practice Development (School of Health & Social Care) is offering the opportunity for health care professionals to complete a short course of CPD in the assessment, evaluation and treatment of people presenting with Minor Ailments. Delivered over a series of three self-contained study days these intensive practical workshops are ideal for any health professional working in GP practices, A&E, Urgent Care Centre, Rapid Response Teams or anywhere that offers a 'Walk-In' service to the public.

Each day will focus on a different range of common presenting problems and provide an introduction to:

- Relevant Anatomy and Pathophysiology
- History Taking & Physical Examination
- Investigations and Treatment
- Safe Discharge & Referral

The Days will cover Minor Ailments relating to the:

Day 1 – Cardiac, Respiratory and Abdominal Systems

Day 2 – ENT and Ophthalmic Systems

Day 3 – Neurological and Skin Conditions

Delivered by practising RCN accredited Nurse Practitioners, and using the latest evidence base, the course will enhance a practitioner's ability to discriminate between presenting problems and provide a rational basis for effective management.

Cost: £120 day with a reduction for those booking all 3 days

Dates: Time and Venue can all be tailored to suit your needs.
