Claim No. 6BD01075	
IN THE BRADFORD COUNTY COURT	
BETWEEN	
PETER SCOTT	
AND	
PROCESS MECHANICAL LIMITED	
Claimant	
Defendant	
-----	
JUDGMENT	
-----	
<p>1. In this action the Claimant, Peter Scott, claims damages against his employer, the Defendant Process Mechanical Limited as a result of an accident at work on 21<sup>st</sup> April 2004. The claimant's case is that the accident was caused by the negligence and/or breach of statutory duty of Process Mechanical Limited and the Claimant claims damages for personal injury and other consequential losses. There is no dispute that as a result of the accident Mr Scott sustained a ruptured Achilles tendon to the right ankle. Damages have been agreed between the parties subject to the issue of liability.</p>	
<p>2. Mr. Scott has been employed by Process Mechanical since about June 2000 as a mechanical engineer. His duties involved pipe fitting, plumbing and associated installation work. When Process Mechanical was first set up in 2000 it traded from premises at Crosslea Hall Works in Bradford but it moved from that site to an office and workshop at Bolling Road, Bradford in January 2004.</p>	
<p>3. When the company moved sites, some of the equipment from the previous site was moved into container storage at the new site. In particular 2 large and very heavy steel work benches and a large steel framework or metal racking were stored in the containers in the yard at Bolling Road.</p>	
<p>4. Following the completion of certain works at Bolling Road and in particular the installation on 19<sup>th</sup> April 2004 of a roller shutter door to the workshop, the company wanted to move the 2 large steel benches and the metal racking from the containers in the yard into the workshop. Mr Alan Haworth, the Managing Director of Process Mechanical, made arrangements to borrow a forklift truck to move the benches and the racking from the containers into the workshop and once in the workshop the benches and racking were to be moved manually by a number of employees, including Peter Scott. The accident occurred in the course of the movement of the</p>
