Working and Learning

*Furniture Collection
2017*

BU

**Bournemouth
University**

Contract for the supply
and installation
of office furniture.

About Us...

We create inspiring environments for working & learning. Working with bof means working with a creative, passionate team of experts; with over 30 years experience as a furniture supplier. Our team are driven to provide an honest, professional and personal experience from initial inspiration to finished installation.

We provide you with the furniture you need, sourced from homegrown and global manufacturers. The furniture featured in this collection is a small selection of product that we supply. If there is a particular product you cannot find, please contact us.

How to Order...

To ensure that the order process is as smooth and timely as possible, please make sure you have the following order information on hand:

- Contact Name
 - Contact Number
 - Email
 - Invoice Address
 - Delivery Address (Building, Room No)
 - Point of Contact for Delivery
 - Delivery Contact Details
 - Quote Reference Number
 - Product Detail (Product Codes, Qty, Product Name, Description, Size, Finish)
- To place your order please fax 01656 661031, or email your purchase order to sales@bof.co.uk

Get in Touch...

Daniel will be managing the Bournemouth University account. Contact Daniel for customer visits, point of contact, site surveys and quotations.

t: 07471 034831
e: dball@bof.co.uk

Lucy will be your dedicated internal account manager; order processing and progressing, day to day enquiries, quotations and product support.

t: 01656 643781
e: lbeard@bof.co.uk

The Environment & Us

The environment is our concern, an integral part of our business and an integral part of our lives.

We are committed to a program of continuous improvement, aiming to prevent pollution and reduce consumption of resources generated in the course of our business.

We aim to promote the reuse of waste wherever possible. We use raw UK materials and combine them with a carefully designed logistical and distribution system to reduce the carbon footprint of our products and our business.

Our Environmental Aims

- Develop and review our objectives & targets to ensure continual environmental improvements.
- Transfer knowledge throughout the company to ensure everybody is environmentally aware and performs in an environmentally responsible manner.
- Promote the efficient use of resources, in particular the use of electricity and fuel throughout operations.
- Reduce our impact on landfill through waste minimisation, segregation and recycling initiatives.
- Liaise with suppliers and contractors so that we acknowledge our environmental responsibilities.

In January 2009 we achieved certification to BS EN ISO 14001. This is an International management standard and demonstrates our business policy commitment to meet its legal and regulatory requirements it also takes account of any geographical, cultural & social conditions affecting the wider community.

In 2008 we became members of FIRA's Club Green. This membership is the environmental legislative update service for the furniture and wider timber industry. The scheme helps us fulfill our requirements to keep abreast of environmental developments as requested by ISO 14001 & FISP.

In April 2010 we achieved certification with the Forest Stewardship Council® (FSC). This chain of custody certification represents the unbroken path which products take from the forest to the consumer, including all stages of manufacturing, transportation and distribution.

Launched in 2006 to support the furniture industry's sustainability credentials, FISP has rapidly become established as the industry forum on an all environmental and sustainable issues.

As of July 2014, we have been a part of the Chartered Institute of Procurement & Supply Sustainability Index. This means we have undergone a rigorous vetting process to validate our green credentials and substantiate our environmental ethos.

We have been full members with FIRA since September 1996. FIRA's aims are to support the development of our business, add value to our products and processes and therefore help improve our overall performance.

Symphony

The Symphony range allows users to work collaboratively or individually in a range of environments. This flexible bench workstation is ideally suited to Learning Resource Centres, I.T. laboratories & general I.T. rooms. The light, contemporary image of this product encourages creativity, productivity and learning. Sliding tops and central cable trays can handle large quantities of cables and prevent users accessing cables.

Symphony Bench desking is supplied at 800mm(d) as standard, 600mm(d) models are available to order. For more information and pricing on height adjustable bench desking please contact your account manager.

Do

Do is the result of taking a completely fresh look at task chair design. It goes without saying that people come in all shapes & sizes and with shared workspaces becoming increasingly common, the need for simple, adaptable seating is more important than ever. User-centred design and a weight balancing mechanism mean there's no longer a multitude of knobs & levers to find and interpret allowing the chair to be easily set up and used.

Wap

Wap is a smart stacking four legged chair, perfect for large scale conference, training or meeting applications. The elegant plastic back is balanced by the subtlety of the upholstered seat, while the cleverly defined details of the stacking feet, the simple linking brackets and the practical stacking trolley ensure that this is the chair for every situation.

Group Work Tables

Group work tables are a flexible solution to classroom layouts which can be used in two configurations: Group collaboration, for working in teams and group focus to Screens, enabling students to work collaboratively while using a projector/screen without their view being obstructed by other students.

90%
RECYCLABLE

00

The Benefits of Group Working...

Plectrum Tables.

- 1. Group Collaboration.** Two students can occupy each edge of the Plectrum table to allow ease of collaboration whilst studying/researching/learning. Using Plectrum tables in this configuration also provides space for lecturers/other students to join the group at each of the three open corners.
- 2. Group Focus to Screens.** This configuration enables students to work collaboratively while using a projector/screen without their view being obstructed by other students. When students no longer need to work from a screen they can quickly reconfigure the seating back to configuration 1.

Eames Chairs

The Eames Plastic Chairs are renewed versions of the legendary Fiberglass Chairs. The original, which was the very first industrially produced plastic chair, was jointly developed with Zenith Plastics for the 'Low-Cost Furniture Design' competition organised by the Museum of Modern Art. In the current version made of polypropylene, these chairs provide even greater comfort.

HAL

'Special is generally less useful than normal': this statement sums up Jasper Morrison's guiding principle for creating designs that are not extraordinary but rather 'super normal' and – just like HAL – that show deference to the dictates of daily life. With HAL, he has reinterpreted the multifunctional shell chair and created a versatile family of chairs with a clean contemporary look. The shape of the seat shell provides great freedom of movement in a variety of sitting positions – even sideways or astride the chair.

Legato

A relaxing soft seating range that creates exciting and inviting shapes by smoothly connecting together. The Legato modular system is just as perfect for large spaces as it is for environments where a small footprint is key. Legato is available in 6 different models that create an unlimited number of configurations due to the 45 and 90 degree linking pieces. As standard, Legato is supplied with a satin silver sled base; but you can specify a chrome base too!
