

MENTAL HEALTH IN OLDER PEOPLE

Version: 1
Level: 7
Credit value: 20 credits (10 ECTS)
Effective from: September 2015

PRE-REQUISITES AND CO-REQUISITES

None

AIMS

This unit will allow students to develop an understanding of mental health issues in older people, and consider approaches to the assessment of mental health needs.

INTENDED LEARNING OUTCOMES

Having completed this unit the student is expected to:

1. Critically discuss ways in which normal ageing affects the mental health of an individual
2. Analyse approaches to the assessment of common mental health problems within older people
3. Describe the presentation of common mental health problems within older people
4. Critically appraise the impact that mental health problems in older people have on families and carers
5. Critically evaluate integrated policy approaches to the care of older people with mental health problems

LEARNING AND TEACHING METHODS

The unit will be delivered through a combination of lectures, seminars, e learning, independent reading and study.

ASSESSMENT

Summative Assessment

ILOs 1-4 will be assessed via course work 1 (60%)
ILO 5 will be assessed via a course work 2 (40%)

Indicative Assessment Information

Course work 1: A poster presentation, detailing the care of a client from practice. The poster should include information on clinical presentation, assessment strategies and integrated approaches to care (60%)

Course work 2: A critical review of the assessment strategies used in formulating an integrated care plan for the chosen client (40%)

INDICATIVE CONTENT

- Mental health and emotional wellbeing in older age
 - The impact of physical health issues on the mental health of an individual
 - The social exclusion of older people with mental health needs; poverty, social isolation, lack of engagement
- Common mental health problems in older people; risk factors, presentation, formulation:
 - depression and anxiety, suicide and self harm
 - differential diagnosis mentioning delirium, depression and dementia but with an emphasis on depression.
