1. Introduction

1.1 General introduction

For practice placement educators and students

This **practice assessment document** is designed as an assessment for the Occupational Therapy Portfolio 2 unit – see 1.5: for a full description of the unit and assessment.

The ‘portfolio’ unit runs over the length of the academic year and students are given their **practice assessment document** early in the year. This document includes all the components of the unit’s assessment as well as recording practice hours, foundation skills assessment and mandatory training. Portfolio Units in the first and second year are worth 40 credits (one third of the year’s credits) with 60% weighting for assessment in practice and 40% for Continuing Professional Development (CPD) work. In the third year they are also worth 40 credits but the weighting is 70% for assessment in practice and 30% for CPD.

60% assessment: (learning outcomes 1 – 4) will be in practice and marked by a Practice Placement Educator (PPE), also by satisfactory completion of practical skills in the University.

40% assessment: (learning outcomes 5 & 6) assessment will be on the student’s CPD and marked by university staff.

Section 3 sets out the process needed to complete the student’s CPD. The CPD should be completed on-line.

Please note: This document contains all of the learning outcomes for the practice placements at Level C. Students and PPEs are expected to refer to these learning outcomes prior to and during practice placements.

In addition to the learning outcomes specified for the ‘Portfolio 1’ unit, skills will be assessed during the following Occupational therapy specific units.

Occupational Therapy in Action 2	Semester 1
Reasoning for Therapy Practice	Semester 1
Exploring Evidence to Guide Practice	Semester 2
Promoting Health and Wellbeing	Semester 2

1.2 Lines of communication

Department Lead

Dr Carol Clark
cclark@bournemouth.ac.uk

**Programme Lead
Principle Lecturer in OT**

Placement Absence & Sickness:

Any absence whilst on placement should be reported to the general reporting hotline **01202 965000** / hscplacements@bournemouth.ac.uk
Students should also advise their PPE/Student Mentor at their placement.

Absence/Sickness from University Lectures:

Any absence from lectures should be reported to the general reporting hotline **01202 965000** / or to the Student Support Team - hscsst@bournemouth.ac.uk

Details are also on the HSS placement website –
<http://www.bournemouth.ac.uk/hsc/placements.html>

It is essential that sickness/absences are recorded. If you have any placement specific queries, please contact your **Placement Support Officer- Barbara Grundy (details above)**.

1.4 Programme structure

First Year

Semester 1 – September - January						Semester 2 – end January - May				Semester 3 – end May - July
Introduction Week	Becoming an OT	BU0 Orientation Placement	Becoming an OT	Winter Break	Becoming an OT Assessment	Analysing Occupation	Spring Break	Analysing Occupation	Assessment	BU1 – six week assessed placement
	Skills for Therapy Practice		Skills for Therapy Practice							
Occupational Therapy Portfolio 1										

Second Year

Semester 1 – September - January					Semester 2 – end January - May				Semester 3 – end May - July	
End of Summer Break	OT in Action 2			Winter Break	OT in Action 2 Assessment	Exploring Evidence to Guide Practice (IPE)	Spring Break	Promoting Health and Wellbeing (IPE)	BU2 – eight week assessed placement	Portfolio
	Reasoning for Therapy Practice									
Occupational Therapy Portfolio 2										

Third Year

Semester 1 – September - January					Semester 2 – end January - May			Semester 3 – end May - July
BU3 – 10 week assessed placement	Research for OT Practice	Winter Break	Research for OT Practice	Assessment	BU4 – 8 week assessed placement	Spring Break	Innovation in Occupational Therapy	Assessment - Conference
			Service Improvement Project (IPE)					
Occupational Therapy Portfolio 3								

1.5 Unit Specification – Portfolio 2

Unit Title: Occupational Therapy Portfolio 2

Version Number: 1

Level: 5

Credit Value: 40 (80 ECTS equivalent credit value)

Effective from: September 2015

PRE-REQUISITES AND CO-REQUISITES

None

AIMS

The aim of this unit is to facilitate development by advancing the knowledge base and the breadth and proficiency of the student's professional practice. Emphasis is placed on principles of humanisation of healthcare and client-centred approaches.

INTENDED LEARNING OUTCOMES

Having completed this unit the student is expected to:

1. Demonstrate advancing knowledge and application of the standards of proficiency and professional standards for occupational therapy.
2. Reflect upon practicing in a way that is professional, non-judgemental and ethical and that respects and acknowledges people as individuals.
3. Plan, analyse and apply underpinning theories, knowledge, legislation and clinical governance in practice.
4. Practice safely and effectively within the scope of practice as a student occupational therapist developing skills in appropriate delegation to others.
5. Explore and analyse processes and factors that lead to the facilitation of/barriers to client-centred approaches and humanising healthcare practice.
6. Demonstrate critical awareness of the concepts of humanisation and client-centred approaches gained from practice, university and wider experiences through reflection and action.

LEARNING AND TEACHING METHODS

In this unit students will participate in different clinical areas where they will be facilitated, guided and assessed by registered practitioners. They will also be encouraged to make use of potential volunteering opportunities.

Students will be encouraged to maintain an on-going portfolio evidencing CPD activities which will be supported by online resources, seminars and workshops on reflective practice and CPD.

Lectures, seminars and online learning resources will focus on humanisation of healthcare and client centred approaches. Service user lived experience of their daily life and healthcare experiences will form a key component of the learning opportunities.

ASSESSMENT

Summative Assessment

ILOs 1-4 will be assessed by Practice Placement (60%) ILOs 5-6 by coursework (40%)

Indicative Assessment Information

The practice placement is an 8 week assessed placement (60%)

The coursework will be a presentation (40%)

INDICATIVE CONTENT

Background to the focus on the humanisation of healthcare

Humanising philosophy

Processes of oppression at the personal, cultural and structural level: (stigmatisation, stereotyping, marginalisation, infantilisation, welfarism, dehumanisation, medicalisation).

Client-Centred approaches

Understanding key terminology (e.g. client-centred, person-centred, family-centred, etc.)

Barriers and facilitators to implementation

Legislation and policies

Vulnerability, risk and safety

Capacity and Informed Consent

Anti-oppressive and non-discriminatory practice

Inclusion, Involvement, Advocacy, Empowerment and Partnership

Service user motivation

Self-determination, self-concept and self-efficacy

Occupational Justice (The impact of inequality, poverty, exclusion, identity, social difference and diversity on occupational performance)

Respecting diversity and unique values, beliefs and interests

Cultural awareness.

Recognising spirituality

Advancing communication strategies

Therapeutic use of self

Accountability

2. Assessment

2.1 Assessment overview

Occupational Therapy Portfolio 2 will be assessed in 2 parts.

1. Practice - 60% - (ILOs 1 – 4)

a. BU2 - Practice Placement

Practice placement BU2 will occur in the second semester. Practice placement educators will assess and grade practice using the competencies and learning outcomes set out in section 6.

2. Continuing Professional Development – CPD - 40% (ILOs 5 & 6)

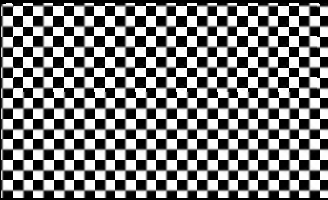

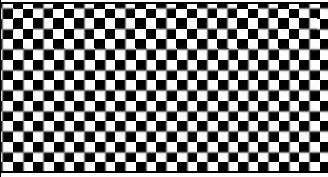

CPD activities will be expected to occur during the whole of the first and second year and include experiences from the practice placement. Students will need to be proactive in completing their CPD and it is expected that progression will occur throughout the year. An up-to-date CPD portfolio should be developed, demonstrating competency as the student moves through the various stages of learning. It is anticipated that the student's practice placement educator will work in partnership with the student on their CPD journey during the placement and comments on the student's development of their portfolio are welcome. The CPD element of Portfolio 2 will be assessed by university lecturers.

BU2 and CPD must be completed successfully in order to proceed to the next year.

2.2 Mandatory Training

Mandatory training **MUST** be completed before going out on BU2; **failure to do so may prevent attendance on placement.**

	On-line training completed evidenced by certificate where applicable.	Practical training	TUTOR or PPE SIGNATURE
Basic Life Support		Date:	
Moving and Handling	Date:	Date:	
Infection Control	Date:	Date:	
Break Away Training		Date:	
Fire safety (completion of fire procedures for each practice locality)	Date:	Date BU2:	

2.3 Assessment in practice

2.3.1 Competencies

There are eight competencies of practice that will be assessed. These are in line with the NHS Knowledge and Skills Framework:

Specific skills: 1. Assessment and treatment planning

Specific skills: 2 Intervention and treatment

Core 1: Communication

Core 2: Personal & people development

Core 3: Health, safety and security

Core 4: Service improvement

Core 5: Quality

Core 6: Equality and diversity

Competencies are the same across each level (year) of the programme but the level of expectation for achieving the learning outcomes differs from year to year. The expectation for achieving the learning outcomes shows the progression that students will make in their performance between level C (first year) to level I (second year) to level H (third year).

Expectations change between the levels (years) in relation to the amount of **support** provided, the **depth of reasoning** required and the **extent** to which students are expected to achieve the intended learning outcomes.

It is highlighted that the expectation is 'By the end of the placement'.

2.3.2 Expectations of the learning outcomes between levels

Year 1	By the end of the placement and with support , students are expected to demonstrate basic knowledge and comprehension in order to begin to :
Year 2	By the end of the placement and with guidance , students are expected to demonstrate analysis and application in order to develop skills to :
Year 3	By the end of the placement and with minimal supervision , students are expected to demonstrate evaluation and clinical reasoning in order to be competent to :

Definitions of 'support'

Support	Support is defined as significant assistance with all aspects of performance.	Year 1
Guidance	Guidance is defined as monitoring the student for areas in which they may need support and offering this as the PPE or student feels necessary.	Year 2
Minimal supervision	Minimal supervision is defined as ensuring safe practice and expecting students to request guidance or support as appropriate.	Year 3

Definitions of 'depth of clinical reasoning'

Knowledge and comprehension	<p>Knowledge is defined as demonstration of factual and conceptual principles that underpin practice.</p> <p>Comprehension is defined as understanding and interpreting knowledge to develop arguments.</p>	Year 1
Analysis and application	<p>Analysis is defined as breaking down knowledge in order to consider different approaches to solving problems and identify limits to knowledge.</p> <p>Application is defined as the ability to use knowledge and theory in new situations to explain practice and make sound judgments.</p>	Year 2
Evaluation and clinical reasoning	<p>Evaluation is defined as synthesizing information gained from practice, experience, concepts, theories and the research evidence in terms of their value and clinical significance.</p> <p>Clinical reasoning is defined as integration of findings to justify decision making based on knowledge, comprehension, analysis, application and evaluation of the information.</p>	Year 3

Definitions of 'extent'

Beginning to	'Beginning to', is defined as basic ability to demonstrate the stated ILOs.	Year 1
Developing skills to	'Developing skills to' is defined as establishing and advancing skills to demonstrate the stated ILOs.	Year 2
Competent to	'Competent to' is defined as demonstrating the ability to practice as a novice professional.	Year 3

2.3.3 Formative and Summative Assessment

Formative assessment

The Practice Placement Educator (PPE) should give formative feedback half way through each placement. This feedback should be to help the student progress and should not equate to any mark, classification or banding.

Comments should be written in the relevant competency located in section 6.3. If there are specific issues then PPEs are required to implement an '*Action plan*' located in section 7.4 in collaboration with the university tutor.

Summative assessment

On completion of the placement it is requested that PPEs provide summative feedback. This feedback should include written comments, a classification band for each competency and a final grade (%).

Written feedback should give the student information on their performance during the placement and also provide them with constructive action points to take forward to subsequent practice placements. Feedback should be written in the relevant competency section located in section 6 for BU2.

The PPE is asked to award a **classification band for each competency**. This should best reflect the achievement of the student by the end of the placement and only marked on the final mark sheet in section 7.

An overall classification mark is given as a **final grade (%)** for the placement. This final grade should reflect the classification bands the student has achieved by the end of the placement and only marked on the final mark sheets in section 8. The grading is not calculated as an average percentage from the competencies but should provide an all encompassing reflection of the students' performance.

The final grade (%) is linked to the following degree classifications.

70 and above:	1st	Excellent
60 - 69%:	2:1	Very good
50 - 59%:	2:2	Good
40 - 49%:	3rd (PASS)	Acceptable
39% and below:	Fail	Poor

2.3.4 Assessment Requirements

This section outlines the requirements to pass the portfolio unit with respect to the assessment regulations and the procedures taken if a student is falling behind in achieving their intended learning outcomes. Full assessment regulations can be found in the programme handbook.

In order to pass the portfolio unit the student must pass both assessment elements of the unit. This is the 60% practice assessment element and the 40% CPD element

The practice assessment element consists of 'Practice skills' and practice placements BU1.

Assessment regulation:

Where a unit contains practice assessments, a pass will be awarded where the overall unit mark is at least 40% and the mark in each separate element of the unit assessment is not less than 40%.

Compensation: Compensation does not apply to units that are assessed in practice

In order to pass practice placement students must pass all eight competencies of the assessment (two specific and six core). This means achieving a third classification, or above, for each competency on the final mark sheet.

Competencies are defined as 'components' in respect of the programme assessment regulation.

If a student fails a competency this is considered failure of a practice component.

Assessment regulation:

Where a practice element has separate components a fail in any one component will result in a mark of 0% being awarded for that element.

The assessment structure enables all students to demonstrate that they have met the intended learning outcomes for each unit, which are mapped to the HCPC Standards of Proficiency for Occupational Therapists. Therefore, assessment ultimately ensures that all students who succeed at assessment have demonstrated that they meet the standards of proficiency.

If a student is falling behind in achieving their intended learning outcomes the PPE should contact the student's academic advisor as soon as possible and the practice placement support will be implemented.

In order to achieve a first class mark, the student should be consistently excellent, normally achieving a first class classification in all competencies. To be awarded 80% or above is extremely rare and should only be awarded to a consistently exceptional student.

By the end of the programme all students need to pass a minimum of 1000 practice hours. Hours in practice will be formally recorded on the Student placement record sheet and confirmed by the practice placement educator.

All placement documentation (assessment formative and summative feedback, mark sheet and hours) must be completed and submitted to administration.

3. Continuing Professional Development (CPD) Assessment

CPD is the **40% assessment element** of the Occupational Therapy Portfolio 2 unit and will be assessed by the development of the student's CPD e-Portfolio which should meet the intended outcomes below:

Intended learning outcomes

5. Explore and analyse processes and factors that lead to the facilitation of/barriers to client-centred approaches and humanising healthcare practice.
6. Demonstrate critical awareness of the concepts of humanisation and client-centred approaches gained from practice, university and wider experiences through reflection and action.

These will be achieved by:

CPD e-Portfolio – This is to be completed by the student by the end of the year, but should be a continuous process throughout their time at university and whilst on placement. A Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis and Personal/Professional Development Plan (PDP) should be peer assessed following BU0 during a facilitated session and revised in preparation for BU1. We advise the student to access the CPD on-line resources available on MyBU and consult COT documentation to help guide them in this process.

Academic Adviser review – The CPD e-Portfolio may be shared with the Academic Adviser during meetings as a prompt for discussion on the student's progress.

Summative Assessment

Students will provide access for the Portfolio Leads to core components of their CPD e-Portfolio for summative assessment at the end of the academic year (see the Assessment Brief on MyBU for details).

The summative mark and feedback will be completed by the Portfolio Lead using the marking form posted under the assessment tab in the OT Portfolio 2 unit on MyBU.

This assessment will take place at the end of BU1.

On successful completion of the Occupational Therapy: Portfolio 2 unit the student will then develop their second PDP in the summer break in preparation for their next year at Bournemouth University. The second PDP and SWOT analysis will then be peer reviewed in a facilitated workshop at the beginning of the academic year.

4. Placements

4.1 Placement information

One placement occurs during Occupational Therapy Portfolio 2.

BU2 Eight week placement which occurs in the second semester

The student will bring the practice assessment document to the placement, having already identified and written their perceived learning needs for the placement to prepare for the negotiated learning agreement. This will include any action points arising from preceding placements. The PPE can contribute if necessary.

The student and PPE will discuss the use of resources available during the placement and appropriate learning outcomes that will encourage the student to apply their theoretical knowledge to practice. These outcomes will be agreed and recorded by the student to form the learning agreement. The student and the PPE will use this agreement to monitor the achievement of the learning outcomes during the practice placement.

At the end of each week, the student will reflect on their progress in relation to their achievements and challenges, making a personal note of actions to be addressed in subsequent weeks. The students will then meet with their PPE, who will provide feedback. Any further action points will be discussed and agreed.

Half way through the placement in the formative sections of the competencies, the PPE will comment on the student's progress in relation to each competency, identifying any issues to be addressed.

Should the student show unsafe practice or violate the rules of professional conduct, please report this to the student's Academic Advisor as detailed in practice placement support.

Throughout the placement, the student will keep a daily record of hours in section 8. Should the student be struggling with specific issues a copy of the negotiated learning agreement should be sent to a university tutor who will then discuss an action plan with the PPE and student. The student online placement evaluation form and Student Reflection on Placement form within the Practice Assessment Document, gives the student an opportunity to provide feedback on the placement.

At the end of the placement the PPE and student must make sure that all relevant pages are signed and dated. The PPE may take a photocopy of the portfolio for CPD purposes but the original must be returned by the student to the university as an official record by the deadline.

Please contact a university tutor or the Practice Education Tutor (contact numbers at the beginning of this book) if you wish to discuss the student's progress. This is essential if you think the student's practice is of poor standard (struggling to maintain a pass). Additionally if you feel that a student is not currently achieving the level of proficiency for their year then you must contact a university tutor urgently to discuss this. Please do not wait until the student is ending the placement before making contact – it is essential that a plan is put in place early to address any difficulties.

4.2 Placement descriptors

To complete the placement experience the student's portfolio of evidence will inform their final personal development plan and will require evidence from this to inform their CPD profiles.

Students will complete a minimum of 35 hours per week, averaged over the course of the placement, to include 3 hours of portfolio development

A placement which is failed must be successfully completed to enable the student to progress to the next level.

The occupational therapy student experience consists of six placements over a three year period, which offers a range of placement opportunities and settings. The majority of the placements are in the Dorset and Somerset region. Settings are acute, rehabilitation, social services and in role emerging areas. Most take place within the NHS, social services, community facilities and independent health sectors.

Year 1: Level 1: **Placement BU0:** A one week orientation to professional practice
Placement BU1: A six week placement

Year 2: Level 2: **Placement BU2: An eight week placement**

Year 3: Level 3: **Placement BU3:** A ten week placement
Placement BU4: An eight week placement

Placements offer a wide range of experience over the three years to give students insight into a variety of settings and invaluable experience as they are developing and consolidating their skills as therapists.

Placements BU1, BU2, BU3 and BU4

Over the three years, students gain knowledge and experience from the blend of academic work and placements. In the final placement student may have an opportunity to arrange their own placement or experience a 'role emerging' / contemporary practice placement. This will be with guidance and support of the academic advisor and placement education tutor. This gives an ideal opportunity for students to discover more about occupational therapy in a specialist area and potentially arrange to work with occupational therapists overseas.

Areas where students can be placed through the University:

Mental Health

Placements can be offered within a variety of mental health settings; community, inpatient, child and adolescent mental health (CAMHS), dementia care and eating disorder clinics are a few examples. Students are able to gain a wealth of knowledge in the different settings whilst being able to put into practice the skills they have learnt whilst at university.

Physical

Students have a range of physical placements available to them within different hospital environments. This can be within acute hospitals that are able to provide a wide variety of ward, outpatient and specialist area (e.g. hand therapy) experience. Community hospitals, Integrated Community Rehabilitation teams and Independent Living Teams are areas where students can experience a different aspect of NHS occupational therapy service provision within local communities. Students can observe and participate within supportive yet challenging environments and develop core skills within physical settings.

Social Care

Placements within Social Care settings enable students to gain insight into community teams working both within adult and children with disabilities services. They are able to gain experience of working with professionals and colleagues not so often accessed through other physical settings, for example; housing and grants officers, social workers from hearing and vision services and local council housing staff to name just a few. Students can also gain experience of working with Occupational Therapists who specialise within housing services and Reablement Teams.

Specialist Areas:

Occupational Therapy is known to be a career that can lead to working in many different areas. Some of the more specialist placements that students may be allocated can be; The Duke of Cornwall Spinal Injuries Unit, Wessex Rehabilitation Unit, Burns and Plastics, Learning Disabilities, Paediatrics, Hand Therapy, Neurology, Vocational Rehabilitation, Pain Management Service, MS Service and Accident and Emergency.

Role Emerging and Contemporary Practice

In addition to the more 'standard' placements within NHS and Social Care settings, students are also given the opportunity to experience placements within charitable organisations and privately run services. Role Emerging Placements are facilitated for students in their third year of study and provide students with a breadth of experience working in settings where there is no current OT provision.

Students will complete a minimum of 35 hours per week averaged over the course of the placement.

Note: A placement which is failed must be successfully completed to enable the student to progress to the next level.

5. Responsibilities

5.1 Responsibilities of student

Prior to placement students should:

- Read all information provided on the student online placements system Placement on the Web (POW) relating to their specific allocation.
- Write an appropriate introductory letter or email to the Practice Placement Educator (PPE) including:
 - checking any questions or issues that have not been answered by the information on POW prior to placement.
 - ensuring that necessary arrangements have been made with regards to start times, accommodation and travel.
- Revise relevant taught information (anatomy etc) and skills in preparation for the placement.
- Complete the first section of the negotiated learning agreement for the upcoming placement which considers personal learning needs for the stage of training and takes into account previous placement experience.

At the start of the placement and throughout students should:

- Behave and dress in a professionally suitable manner at all times – being courteous to all and respecting the clinical judgment supporting the feedback and marks given.
- Observe the COT Code of Ethics and Professional Conduct and HCPC Standards of Conduct, Performance and Ethics at all times.
- Discuss and complete the negotiated learning agreement with the PPE.
- Plan a programme of experience with the PPE which takes into account placement opportunities and the above.
- Inform the PPE and a university tutor in the case of any problems or unforeseen circumstances which may affect the ability to complete the placement within the agreed time.
- On the first day students must ensure they know the process for sickness reporting for the placement and at all times follow the procedure of the placement setting and that of Bournemouth University School of Health and Social Care regarding absence and sickness.
- Use the opportunity of supervision and assessment effectively and actively contribute to this process.
- Use every opportunity while on placement to fulfil personal learning needs and improve clinical skills with a range of service users, working at a level appropriate to the stage of training reached.
- Reflect on the placement experience enabling personal and professional development. Complete selected items of evidence to add to CPD portfolio and review these with the PPE where relevant.
- Maintain a reflective report and contribute to the various elements of continuing professional development portfolio.

- Contact their academic advisor at any point of the placement should they have any concerns for placement support and / or pastoral issues.

At the end of the placement students should:

- Complete the reflection on the placement experience (page within the PAD) and ensure their PPE has time to read the reflection and discuss any points as necessary. PPEs may also take a copy of this for their own CPD.
- Complete the relevant paperwork by the required date and submit their PAD to the Placement Administration Team by the submission date given.
- Ensure that the CPD portfolio is updated, and identify further needs in CPD.
- **Under no circumstances** should the student challenge the PPE's judgement and grades awarded. Any concerns related to the marking should be raised with the academic advisor at the earliest opportunity so that they can be addressed.

BU2

I agree to abide by the above at all times during the BU2 placement. If, at any time I have any concerns or questions relating to these expectations I will contact the student's academic advisor or the placement education tutor to discuss:

Signed by PPE: Date:

5.2 Responsibilities of practice placement educator

Responsibilities of the Practice Placement Educator – BU2

Prior to the Placement starting the PPE should:

- Review the Practice Placement Guidance Document that will be emailed to all PPEs prior to placement commencing.
- Undertake appropriate Practice Placement Educator training;
 - For 'new' PPEs a one day course with pre-course workbook (for details contact: hscpostregadmissions@bournemouth.ac.uk)
 - For PPEs who have previously had training either at Bournemouth University or at another University we would strongly recommend attending an update every 2 years or attend an update directly before having a student (for details contact: sophies@bournemouth.ac.uk)
- Review the Practice Assessor Website for additional placement related information and support: <http://practiceassessor.bournemouth.ac.uk/>
- Provide placement information for students in advance of the placement through the Placement Environment Profile and in response to introductory emails.
- Be aware of equal opportunities and anti-discriminatory policies and their monitoring and implementation in relation to students.
- Prepare an induction for the student's first day.
- Formulate the outline of an appropriate student diary / placement plan to be added to and developed during the placement.

At the start of the placement and throughout the PPE should:

- The PPE(s) should meet and carry out an induction with the student, which should include:
 - Location of appropriate literature such as policies, books etc
 - Tour of practice facilities and location of lockers, library etc
 - Emergency procedures and policies in the event of fire, cardiac arrest etc.
 - Necessary contact details in the event of an emergency and reporting sickness/absence.
- Ensure student has PPE's contact number(s)
- Ensure that the student always has a named member of the MDT to refer to.
- Develop a programme with the student which reflects their learning needs as identified in the negotiated learning agreement and identify learning opportunities within the clinical placement area
- Plan a programme of experience which takes into account placement opportunities and the above.
- Schedule weekly formal supervision. This is essential to develop the student's learning informed by the placement learning outcomes and the negotiated learning agreement. This must be documented in supervision notes and stored appropriately.
- Plan a date and time for the midway assessment and contact the student's academic advisor to ensure that the halfway university contact (time, date and method) is also 'booked in'.
- Ensure the halfway and final feedback reports are given to the student at the appropriate times.
- Provide learning, support, teaching and supervision, which encourage safe and effective practice; independent learning and professional conduct.
- Inform the student's academic advisor or the placement education tutor as soon as possible if any concerns arise regarding the student's performance.

- Inform the student's academic advisor or the placement education tutor as soon as possible if a situation arises which may affect the student's ability to complete the placement within the agreed time.
- Review relevant reflections and items from the student's CPD portfolio with them during supervision. Encourage them to amend and add to their PDP and to reflect on events that may be useful to aid their learning.

At the end of the placement:

- Complete the student final / summative feedback for each of the 8 competencies reflecting on what they have achieved by the end of the placement and recommendations for future development. The hours sheet and final report sheet must be fully completed and signed by student and PPE before the submission of the PAD to the university.

<p>BU2</p> <p>PPE Name:.....</p> <p>Setting:.....</p>
<p>I agree to abide by the above at all times during the BU2 placement. If, at any time I have any concerns or questions relating to these expectations I will contact the student's academic advisor or the placement education tutor to discuss:</p> <p>Signed by PPE: Date:</p>

5.3 Responsibilities of the university tutor

Responsibilities of the Student's Academic Advisor:

- The student's academic advisor will contact the PPE in the early stages of the placement to open lines of contact and agree arrangements for the halfway placement contact.
- A midway consultation will be undertaken between the academic advisor (or named member of academic staff should the academic advisor be unavailable), the student and the PPE separately and/or together, which will include personal and academic issues such as:
 - Review of student progress on placement.
 - Assessment criteria.
 - Pastoral issues which may have a bearing on the success of the placement.
- The academic advisor may arrange additional face to face visits with the student and PPE during the course of the placement, should additional support be required.
- A record of the visit or discussion will be recorded by the tutor for the student's file. A copy of this must be signed as an accurate record by student, PPE and tutor.
- Support phone calls will make use of the summative and formative assessment areas of the competencies discussed between student, PPE and academic advisor to record agreed observations. The Practice Assessment Document's Action Plan can be used to monitor implications for the students if it is decided that a structured approach is necessary.

BU2

These responsibilities have been agreed by the Bournemouth University Occupational therapy Team.

6. Practice Assessment BU2

6. Practice Assessment BU2

6.1 Competencies

By the end of the placement and with **guidance**, students are expected to demonstrate **analysis and application** in order to **develop skills to**:

Competency	Learning Outcomes
Specific skills 1 Assessment and treatment planning	<ol style="list-style-type: none"> 1. Plan an assessment strategy. <ol style="list-style-type: none"> a. Sources of information. b. Techniques selected for assessment c. Gathering of relevant information. 2. Interpret assessment information. <ol style="list-style-type: none"> a. Summarises assessment findings b. Demonstrates logical thinking. c. Produces a problem list from assessment findings. 3. Plan intervention or treatment based on assessment findings. <ol style="list-style-type: none"> a. Goal setting with service user. b. Selects appropriate intervention c. Rationale for selection of intervention.
2 Interventions and treatments	<ol style="list-style-type: none"> 1. Conduct appropriate interventions or treatments. <ol style="list-style-type: none"> a. Delivery of case management including discharge planning. b. Health promotion and well-being. c. Evidence to influence intervention. 2. Review interventions. <ol style="list-style-type: none"> a. Strengths and weaknesses of an intervention. b. Outcome measures. c. Reflects on the outcome. 3. Safe and effective performance of interventions or treatments. <ol style="list-style-type: none"> a. Skill b. Grades or adapts c. Range of skills.
Core 1 Communication.	<ol style="list-style-type: none"> 1. Demonstrate effective two-way verbal and non-verbal communication. <ol style="list-style-type: none"> a. Listening skills. b. Body language. c. Language. 2. Clearly and accurately documents information. <ol style="list-style-type: none"> a. Recorded information is clear and accurate. b. Storage c. Separate issues, fact and opinion statements. 3. Adapt communication to a range of people, matters and settings. <ol style="list-style-type: none"> a. Communication tools. b. Rapport. c. Communication in groups and teams.
2 Personal and people development.	<ol style="list-style-type: none"> 1. Demonstrate development of personal skills and knowledge. <ol style="list-style-type: none"> a. Identifies areas for improvement b. Sets own goals c. Engages with resources, (e.g. library and training). 2. Demonstrate self development using reflective practice. <ol style="list-style-type: none"> a. Reflects on practice and own development b. Makes use of feedback and supervision. c. Implements changes in response to reflection. 3. Demonstrate development of others. <ol style="list-style-type: none"> a. Supports others b. Facilitates skills and knowledge of others c. Understands others learning needs and preferences

<p>3 Health, safety and security.</p>	<ol style="list-style-type: none"> 1. Recognise the need for a healthy, safe and secure working environment. <ol style="list-style-type: none"> a. Risk. b. Accountability. c. Policy and legislation. 2. Apply healthy, safe and secure working practices <ol style="list-style-type: none"> a. Moving and handling. b. Infection control. c. Secure working practice. 3. Monitor and maintain health, safety and security of self. <ol style="list-style-type: none"> a. Competency. b. HCPC codes of conduct. c. Fitness to practice.
<p>4 Service Improvement</p>	<ol style="list-style-type: none"> 1. Incorporate research and evidence to improve practice. <ol style="list-style-type: none"> a. How evidence can improve practice b. Relates evidence to practice area. c. Use of evidence to inform decision making. 2. Be aware of administration for the practice area. <ol style="list-style-type: none"> a. Participates in audit and quality control. b. Report appropriately complaints and feedback. c. Clinical governance.
<p>5 Quality</p>	<ol style="list-style-type: none"> 1. Demonstrates professional practice behaviour. <ol style="list-style-type: none"> a. Respects confidentiality. b. Trustworthiness and reliability. c. Conduct, appearance and manner. 2. Demonstrate inter-professional and team-working skills. <ol style="list-style-type: none"> a. Respects roles of members of the MDT. b. Assists and supports team. c. Collaborates with MDT for coordinated care. 3. Demonstrate management skills. <ol style="list-style-type: none"> a. Manages time. b. Demonstrates organisational skill. c. Delegation. d.
<p>6 Equality and diversity</p>	<ol style="list-style-type: none"> 1. Demonstrates sensitivity to equality and diversity. <ol style="list-style-type: none"> a. Equality. b. Diversity. c. Policies and procedures. 2. Demonstrate awareness of consent and ethical behaviour issues. <ol style="list-style-type: none"> a. Consent b. Ethical behaviour. c. Vulnerable client group. 3. Demonstrate service-user centred practice. <ol style="list-style-type: none"> a. Service-user – therapist relationship. b. Services –users views and preferences c. Collaborative decision making.

6.4 Action plan

This action plan is to be used if a student is falling behind in achieving their intended learning outcomes

Please identify the reason for this action plan (sickness, lack of appropriate clinical experience, lack of student forward planning, other).

Please provide details:

Within the action plan please address the following as applicable:

The specific areas of learning that need to be achieved

Areas/issues to be targeted

Review dates and implications of not achieving them

The need and rationale for extension

Signed:

Student **Date:**

PPE..... **Date:**

Academic Advisor **Date:**

6.5 Disciplinary procedure

Standards of Conduct, Performance and Ethics (including safety)

Unsafe practice or violations of Professional Standards (HCPC 2008) will cause the student to fail the placement following a process which includes one verbal and two written warnings. Records of all warnings of unsafe practice or concerns about the professional behaviour of the student must be recorded in the boxes overleaf. If a final warning (the second written warning) is given the assessment mark will be negated and a mark of '0' will be recorded.

In exceptional circumstances the student may be withdrawn from the placement earlier in the process after discussion with the University Link Tutor.

- **Fails to adhere, at all times, to personal and professional standards which reflect credit on the profession.**
- Fails to apply knowledge of the departmental health and safety policy to specific service user groups/conditions.
- Does not respect service user confidentiality.
- Is unreliable in verbal reporting or written records that may put service users or others at risk and often fails to tell the educator about adverse findings and/or service user complaints.
- Is unaware of, or disregards, contraindications of treatment.
- Persistently applies treatment techniques and handling skills in a way which puts service user or self at risk.
- Practices outside their safe scope of practice.
- Fails to communicate appropriately or respect the rights, dignity and individual sensibilities of service users.
- Demonstrates an unprofessional attitude towards staff (fails to communicate appropriately with other staff, does not cooperate with staff, does not accept feedback from practice placement educators appropriately, criticises practice placement educators in front of service users and wastes time).
- Fails to gain consent of service users in an appropriate manner.
- Persists in unsafe practice despite verbal instructions and/or warnings including violations in moving and handling and infection control.
- Is unaware of personal health issues that affect performance or judgment.
- Inappropriately advertises personal services.
- Sells, supplies, endorses or promotes the sale of services or goods in ways which exploit the professional relationship with the service user.
- Participates in illegal activities.

7. Administration BU2

7.1 Information

- The PPE completes the summative assessment form, ensuring all appropriate pages have been signed, to provide a record of the student's performance during the placement. This includes the hours completed.
- The student is encouraged to photocopy the completed summative assessment sheet twice, one for the PPE and one for themselves.
- Students submit the original practice assessment document to the Placement Administrator on the first day that they return to the university.
- A selection of the student Practice assessment documents will be sent to the External Examiners.

Should a student fail a placement they will be required to repeat and pass the placement in order to progress to the next level of the programme. Students are only permitted to re-sit one placement per academic year.

Occasionally students are unwell or have circumstances that require them to withdraw from placement. Where appropriate, PPEs may be asked if the student can complete the placement at a mutually convenient time.

7.2 Final mark sheet: BU2

Placement percentage mark (based on PPE judgment of student overall)	
<i>Failure in one or more competencies should result in a mark of less than 40%</i> <i>To achieve a 1st the student should normally achieve a 1st in all competencies</i> <u>Awards of 80% or above are extremely rare and should be reserved for exceptional students</u>	<div style="border: 1px solid black; width: 100px; height: 40px; display: flex; align-items: center; justify-content: center;">%</div>
Practice Hours completed:	<div style="border: 1px solid black; width: 100px; height: 40px;"></div>

7.3 Student placement record sheet BU2

Students will complete a minimum of 35 hours per week, averaged over the course of the placement. Half day is not a requirement of the university and should not be expected by the student. Study time is awarded at the discretion of the PPE. Furthermore, if a half day study day is allowed, care should be taken on how this is recorded as part of the placement hours. If the study time is used to prepare for placement related activity e.g.; case study, educational leaflet, assist with audit or literature search; or to work on a particular placement related objective, this can be counted as part of the placement hours. If however the student uses this time to work on an assignment or travel home this is not counted as placement hours.

The PPE is required to fill in a Student Placement Record Sheet so that a record of all the student's practice hours can be kept for the student's three year BSc programme. The student **must** complete a minimum of 1000 hours of practice as well as succeed in all academic work, to be eligible to apply for HCPC registration.

Students must:

- **Record the date and activity code(s) in the relevant boxes** (see table overleaf). If the student has a day when different activities are undertaken in the morning and in the afternoon, this should be noted by dividing the box.

Example:

Morning in Day Hospital
Afternoon in Community

Placement am
Sick pm

6th	6th
4	3.5
P	S

- **Report sickness/absence from placement:** Inform the practice placement educator **and** the Placement Administration Team at Bournemouth University; 01202 965000 /01202 967344 if you are unable to attend because of sickness or any other reason.

It would be appreciated if Practice Placement Educators could contact Bournemouth University staff using the number(s) given in section 1.2 or the Placement Administrator at the given email address if a student does not attend a placement as planned.

- **Sign** to certify that the information on the form is correct. At the end of the placement the practice placement educator must also sign the form.

Key for Activity Codes:

P = Placement

ST = Study

BH = Bank Holiday

S = Sick

C = Compassionate Leave

A = Other Absence

Important:

Do not include your lunch breaks in your daily hours.

Please total your hours carefully each week in the space provided.

Please complete all the information in pen.

Thank you.

Hours - Please complete hours worked to the nearest quarter e.g. 3.0, 4.25, 7.5, 8.75 etc.

8. Documentation

8.1 Practice Placement Support

The University staff will endeavour to promote and maintain good communication with practice placement education settings at all times.

When a student is on placement, their academic advisor will be available by phone or email for contact by the student or PPE. The academic advisor should be the first point of contact for the PPE unless they have been informed otherwise.

Prior to the placement commencing, the student will have a placement briefing at University. They will be advised to inform their academic advisor immediately if problems arise prior to commencing or whilst on placement. Students will complete a negotiated learning agreement with the PPE for each placement, which will identify any specific learning needs/problems the student has.

Students with additional learning needs are strongly encouraged to take responsibility for disclosing these to their PPE(s) though in some circumstances the academic advisor or placement education tutor may feel it is beneficial to discuss these needs prior to the placement commencing, especially if reasonable adjustments need to be made in order to facilitate the placement.

Prior to each placement, the academic advisor will email the PPE to introduce themselves and inform the PPE of contact details (phone number, email and working hours). The PPE will be asked to inform the student's academic advisor if there are any problems during the placement.

Students must discuss support arrangements with the PPE and academic advisor at an early stage during the placement, including the half-way phone call.

Once a PPE/student has contacted the academic advisor (or another member of the team if the academic advisor is not available and immediate support is required), a phone call will be made to discuss the problem with the student and /or PPE. Many issues will be dealt with by phone/email and subsequent contact may be planned as part of the process of supporting the student/PPE throughout the placement. The academic advisor will record the phone conversations with the PPE and student and these will be stored in the student's personal file at BU.

It may be appropriate for the academic advisor to arrange a time to visit the student and the PPE so that a face to face discussion can take place and the appropriate course of action can be agreed so as to support the best possible outcome for the student and PPE. This may mean the placement ceasing and the academic advisor supporting the student to submit mitigation or request an extension (therefore completing the placement at another date). If a student is deemed unsafe or issues relating to Fitness to Practice are being raised then the appropriate actions will be taken.

A placement may be stopped due to reasons not relating to failure (eg: health difficulties , bereavement) where a student would be seen as being 'signed off' as an employee would be at times of difficulty. If a placement is stopped for reasons of disciplinary, professional conduct difficulties or unsafe practice then, in agreement with PPE this will be recorded as a fail. In either circumstance students will be met with on return to university to discuss how to proceed. If a student shows any signs of struggling or failing the placement the academic advisor must be contacted as early as possible so as to support both PPE and student.

Students must be given clear feedback so that they are given the opportunity to respond, develop and improve.

8.2 Health and safety on work placements

Students on industrial placements come within the scope of the Health and Safety (Training for Employment) Regulations 1990. In effect, **you are deemed to be an employee of the organisation** providing the placement opportunity ('Placement Provider') – this is regardless of the duration or location of the placement and whether or not you are paid. The following information contains factual advice on the various responsibilities that exist during work placement. It is intended to supplement rather than replace the information which should be provided by your Placement Provider during your induction into the workplace and thereafter.

So what are your health and safety responsibilities?

As a student on a placement you have the same legal duties as any other employee. They include:

Taking reasonable care for your own health and safety and that of others who may be affected by what you do, or fail to do. This will include the disclosure of relevant personal information to your Placement Provider, e.g. disabilities.

Co-operating with your Placement Provider on health and safety, and reporting promptly any situation you believe to be unsafe.

Correctly using work items provided to you, including personal protective equipment, in accordance with training instructions.

What duties does the University have during placement?

The university recognises that it has a duty of care towards you in relation to your placement to the limited extent we can contribute to preventing foreseeable injuries.

The university will give the Placement Provider any information that it holds which it has reason to believe may be needed in order to ensure your health and safety. The exception to this is where you disclose information to us that you wish to remain confidential – in this instance you are advised to notify your Placement Administrator and discuss the relevance of this to your placement.

The university will also give you an opportunity to feed back to us any problems you may have experienced with health and safety while on external placements. The university will then respond to any negative feedback received in this way by passing this information back to the Placement Provider in order to respond/rectify matters.

If you are concerned about any aspect of occupational health or safety, you must first discuss the matter with your contact at the Placement Provider. However, if your concerns persist then please refer to your School, who will obtain the necessary advice.

What does your Placement Provider need to do to ensure your health and safety?

Your Placement Provider has the primary duty under law to ensure, as far as is reasonably practicable, your health, safety and welfare at work. In general, this means making your workplace safe and without risks to health.

This will include: ensuring their premises and machines are safe and that safe systems of work are set; ensuring all materials and substances are moved, stored and used safely; providing you with adequate welfare facilities; giving you the information, instruction, training

and supervision necessary for your health safety, and consulting with their workforce on health and safety matters.

The provision of induction in workplace health and safety arrangements remains your Placement Provider's responsibility as this will include matters that only they will be aware of (such as listed below).

In order to safeguard your health and safety, your Placement Provider must:

Assess the risks to your health and safety (and record the significant findings if there are 5 or more employees) and then make arrangements for implementing the health and safety measures identified as being necessary by the assessment.

Draw up a health and safety policy and bring it to your attention (if there are 5 or more employees).

Appoint someone competent to assist with health and safety responsibilities.

Co-operate on health and safety with other employers sharing the same workplace.

Set up emergency procedures (e.g. action in case of fire).

Provide adequate first aid facilities and report certain injuries and dangerous occurrences to the health and safety enforcing authority.

Ensure that work equipment is suitable, so far as health and safety is concerned, and that it is properly maintained and used.

Ensure that the workplace has adequate facilities for ventilation, temperature, lighting, and sanitary, washing and rest facilities.

Prevent or adequately control exposure to substances which may damage your health and provide health surveillance as appropriate.

Take precautions against danger from flammable or explosive hazards, electrical equipment, noise and radiation.

Avoid hazardous manual handling operations, and where they cannot be avoided, reduce the risk of injury.

Provide free any protective clothing or equipment, where risks are not adequately controlled by other means.

Ensure that appropriate safety signs are provided and maintained.

8.3 Student crisis procedure

In the event of a major crisis happening to a student while on placement, the following guidelines should be adhered to.

Student

If the student is able, they will:

- Contact their PPE
- Contact their Academic Advisor
- Contact the University SHSC Administrator (01202 967254 or 967319)
- If appropriate contact their general practitioner or an ambulance

Practice Placement Educator

If there is anything in the student's behaviour, attitude or state of health that causes concern the PPE will:

- Arrange appropriate medical attention
- During working hours, contact a University Tutor or Programme Leader to liaise regarding the student's needs and who is in the best position to take ongoing action
- Out of working hours, take responsibility and act in the most appropriate way. The next of kin may need to be contacted

University Staff

University staff will endeavour to visit the student on the day the crisis is reported. If contacted by a PPE, University staff will:

- Liaise regarding the student's needs and who is in the best position to take ongoing action
- Make arrangements to visit

If contacted by the student while on placement the University staff will:

- Inform the PPE
- Take action on the student's behalf if necessary
- Make arrangements to visit

8.4 Audit

Placements are audited using an online audit tool embedded within the Arc placement computer system. It is available to PPEs through their Placement Environment Profile access and completed in conjunction with the Placement Education Tutor or another appropriately identified member of staff.

Monitoring of placements is also carried out through the Annual Contract Reviews and through the scrutiny of the Local Education Trust Boards. As part of these processes students complete online evaluations following each placement within the Placement on the Web (POW) system.

:

- The audits are carried out annually or at least every 2 years
- The results are monitored by the University and the action plan considered
- The action plan informs forward placement planning

The OT team consult with PPEs and the named placement co-ordinator as well as the NHS Trust's organisational lead for education to discuss any issues related to placement learning. In this way the OT team are confident that all placements used are safe and effective learning environments.

Known placements are used where HCPC registered OTs will be supervising the student directly or shared with others. All new placements may occasionally be visited to support a new PPE in completing the documentation. The Academic Advisor is the students' link in monitoring when the student is out on placement.

Emerging placement outside NHS and Social Care services will be visited during recruitment.

8.5 Placement learning

Students are expected to meet the Health and Care Professions Council's standards for skills required to practice Occupational Therapy. These include the identification and assessment of health and social care needs, formulation and delivery of plans, strategies to meet these needs and critical evaluation of the impact of the intervention for the individual.

Throughout the programme, placements are interwoven with learning and teaching units allowing students to immediately apply theory to practice and consolidate skills.

Learning in practice is an integral part of occupational therapy education, and makes an equal contribution to programme outcomes. A diverse range of practice placements will reflect the present and future practice environments and the changing nature of services by offering a wide range of experiences e.g. in traditional hospital settings, Community Hospitals, Hospices, Specialist Centers, Social Care and in new areas where assessment of occupational performance is a requirement. Placement teaching will enable students to contextualise their learning and apply theory to practice.

A minimum of 1000 hours are required for practice placement education, both for registration with the Health and Care Professions Council, and for the College of Occupational Therapists and the World Federation of Occupational Therapists.

There are four different practice placements in the course, plus an *orientation* placement early in the first year. The aims of these practice placements are detailed in each of the level handbooks. Each placement (apart from the *orientation* placement) is summatively and formatively assessed by practice placement educators, who are skilled occupational therapists. Emerging areas for placement opportunities are explored and encouraged where satisfactory supervision can be arranged.

If a student fails to meet the required standards on any practice placement will need to repeat a practice placement, in its entirety, in a similar field of occupational therapy practice. The exception to this is where a student fails and then withdraws from the course.
