

WORKSHOP REPORT

The UK-China Health and Economy Partnership 中英健康医疗与经济合作项目

26 November to 1 December 2017
Jinan, China

A novel knowledge transfer partnership promoting long-term collaboration in pharmacoeconomics

EXECUTIVE SUMMARY

On November 26, 2017, the UK-China Health and Economy Partnership Project, co-organized by Shandong University (SDU), Fudan University, Bournemouth University, University of York and University of East Anglia, was formally launched in Jinan.

This project aims to develop a long-term partnership between researchers from the two countries, promoting the long-term collaboration in pharmacoeconomics by knowledge innovation.

The purpose of this project is to get key UK and Chinese universities to change the ways they share pharmacoeconomics knowledge by developing a long-term educational collaborative that promotes improvements in patient and economic well-being.

Researchers from leading domestic universities and research institutes attended the launch event. After the ceremony, the delegates took part in a five-day workshop on theories and methodology of pharmacoeconomics.

Delegate feedback after the knowledge transfer workshop was extremely positive. In all dimensions, attendees reported that they were either satisfied or highly satisfied. The programme was very welcome by all who attended.

WORKSHOP REPORT

The UK-China Health and Economy Partnership
中英健康医疗与经济合作项目

SUCCESS

The inaugural workshop of the UK-China partnership in Jinan was an outstanding success that proves the benefits of working together in international collaboration. The face-to-face meeting was the results of many months of planning and coordination, which led to the successful outcome of very high levels of satisfaction amongst the delegates and the organisers. We would like to thank our support team, the attendees, our partner universities, the British Council and GSK for their generous support and encouragement. This document summarises the activities and the feedback of the workshop and demonstrates what can be achieved by working together. We plan many more joint activities over future years based upon the foundation stone of this launch meeting. This document also lists our plans for future work. We hope that this document stimulates interest in our partnership and that we have further opportunities to work together, in international collaboration, in the coming years.

Professor Sun Qiang on behalf of the UK-China Partnership

在济南举办的首届英国合作伙伴项目研讨会取得圆满成功，这是国际合作互利互益的佐证。经过几个月的筹划和协调，才有了这次面对面交流的会议，不管是各位参会代表还是会议组织方都对此次会议给予高度评价。在此对本次会议的支持团队、与会者、各合作伙伴大学、英国文化委员会和葛兰素史克公司的慷慨支持和鼓励表示诚挚的感谢。本文件概述了研讨会的各项活动及其反馈，并阐述了通过各方共同合作而取得的成果。我们希望以此次会议作为基石，在未来组织更多国际合作活动。这份文件还列出了我们今后工作计划。我们希望这份文件能进一步激发各方合作伙伴的兴趣，希望未来几年大家有更多机会进行国际合作和交流

孙强教授谨代表中英国际合作伙伴项目

INTRODUCTION

On November 26, 2017, the UK-China Health and Economy Partnership Project, co-organized by Shandong University (SDU), Fudan University, Bournemouth University, University of York and University of East Anglia, was formally launched in Jinan.

This project aims to develop a long-term partnership between researchers from the two countries, promoting the long-term collaboration in pharmacoeconomics by knowledge innovation.

During the launch ceremony, Darrin Baines, Professor of Health Economics at BU and Sun Qiang, Head of the School of Healthcare Management, SDU, gave detailed introductions to the project. Wang Fengshan, Associate Dean of Cheeloo College of Medicine, SDU, affirmed the importance of pharmacoeconomics in the field of healthcare, hoping that the collaboration and communication between UK and China would be enhanced. Representatives from funding organizations including Glaxosmithkline, the British Council and Fudan University, expressed their support for the UK-China Health and Economy Partnership.

Researchers from leading domestic universities and research institutes attended the launch event (Table 1). After the ceremony, the delegates took part in a five-day workshop on theories and methodology of pharmacoeconomics.

PURPOSE

The UK-China Health and Economy Partnership is a novel knowledge transfer partnership that will promote long-term collaboration between the universities of Fudan, Shandong, Bournemouth, East Anglia and York.

The purpose of this project is to get key UK and Chinese universities to change the ways they share pharmacoeconomics knowledge by developing a long-term educational collaborative that promotes improvements in patient and economic well-being.

ACTIVITIES

The Health and Economy Partnership is currently building capacity and capability in pharmacoeconomics designed to impact population health and economic development in China. The current project is funded until December 2018. During this time, planned knowledge transfer activities between delegates and the participating universities will be delivered. These include:

1. Growing the network to include key 20 Chinese universities involved in partnership activities and whose health economics experts are consulted by the Chinese government
2. Support for delegates with research projects, publications and joint funding applications
3. Production of a special issue of Pharmacoeconomics on health economics in China
4. Academic visit to UK of representatives from Fudan and Shandong universities
5. Promoting the translation of key health economics textbooks from English to Chinese

These activities will help build a platform for leading academics from UK and China to share health economics knowledge. They will help the partnership enhance its activities by incorporating a focus on Chinese HTA systems and mechanisms in ways that benefit patients with faster access to cost-effective medicines.

LAUNCH EVENT

Details

- **Date:** Sunday 26th November 2017
- **Time:** 10:30am – 12:00pm
- **Venue:** Quancheng Hotel, Jinan, Shandong
