

**Bournemouth
University**

Something for everyone – public health as a focus for Postgraduate study

Dr Liz Norton, lnorton@bournemouth.ac.uk

+44 (0) 1202 967264

The purpose of this session is to:

- Illustrate how public health encompasses wide-ranging national and global issues and consider why it is seen as being relevant to all.
- Help you to discover how you and your interests fit into the public health agenda by helping you to uncover your own passion for this subject area.
- Find out how postgraduate study of public health can help you to develop the necessary knowledge and academic skills required in the vital quest for the improvement of health and wellbeing both nationally and internationally.
- Inspire you to study public health at Bournemouth University.

A silhouette of a world map is centered on a vibrant sunset sky. The sun is low on the horizon, creating a bright orange and yellow glow that transitions into a darker red and orange as it moves away from the horizon. The map is dark, almost black, and stands out against the colorful background. The text "The United Nations Sustainable Development Goals" is overlaid in white, bold, sans-serif font across the center of the map.

The United Nations Sustainable Development Goals

- What is **your** public health passion?

- How does **your** background fit with the study of public health at postgraduate level?

- Why study public health at post graduate level and what *characterises* post graduate or level 7 study?

Characteristics of study at level 7 :

- Developing in-depth knowledge
- studying independently
- thinking independently
- being able to analyse research and other types of knowledge and coming up with conclusions based on this
- being able to evaluate your own and other's work
- being able to draw information together, to come up with new solutions to problems and offer new ways of thinking about things
- being able to communicate ideas and arguments effectively and accurately in an academic way.
